

Colorado Young Leaders Workshops

Workshops are a great way to supplement your school or organization's programming in order to support your students' leadership growth, dig deeper into who they are and what they care about, and to empower young people with the tools and skills to lead.

You can choose one or all - each workshop is facilitated by a Colorado Young Leaders staff member.

What's Your Spark?

The "What's Your Spark?" Workshop is an introduction to leadership and community engagement that gets your students thinking about their interests and passions, and how their passions inform the way they make decisions, communicate and interact.

Students will work to break down barriers to allowing us to step into a new world of community-centered mindsets.

Uncover Your Journey

The Uncover Your Journey Workshop is an opportunity for students to identify the key attributes to their personal journey, explore their values, and create a ME Model™. A ME Model™ is a 5D sculpture that is created in a hands-on facilitated process to fosters self-expression and innovative thinking.

In this workshop, students will uncover their values and explore how they see the world. They will build confidence as they dig into who they are and share who they are with others.

Blaze Your Own Trail

In the Blaze Your Own Trail Workshop, students will learn how to talk about who they are, the experiences they have had, what they value, and how to share the impact they have made in their communities. This workshop allows students to reflect and feel confident in who they are becoming so they can go out in the world and blaze their own trail.

Students will identify buildable skills they have learned, and how their experiences may influence their next steps or support the building of their personal essays or resumes.

Together We Serve

The Together We Serve Workshop is great for teams, clubs or classrooms to work together and identify a cause area in order to affect change. This workshop helps students more deeply understand their role in making a positive difference.

Students will think through project ideation to implementation. Participants will learn the power of collaboration by connecting with CYL's Nonprofit Partner Network to seek out support in implementing their project.

Together We Lead

The Together We Lead Workshop will engage, empower, and guide students to envision and create a vision for change for themselves as leaders. In this workshop, students will identify their unique leadership style and how they can show up using their leadership superpowers.

Students will gain insights into their interests, passions, priorities, and understand how to move their goals forward for a specific club or school group.

Request a Workshop!

Scan the QR Code to access the Workshop Request form and the CYL team will follow up for next steps.

Cost: \$350 for each workshop for up to 30 students, \$5 per each additional student (scholarships available upon request). Each workshop includes a pre and post-workshop activity to support your students' learning.

Length: 2 hours per workshop is recommended. Accommodations can be made based on organization/school needs
